ABOUT SYMENA

SYMENA'S NETWORK performance enhancement tools deliver significantly improved coverage and capacity with reduced capital expenditure by optimizing the deployment of network infrastructure. This promise depends on leading edge knowledge of the latest mobile phone standards combined with automated optimization expertise. Symena's tools let operators deploy performance enhancing technology in the most effective and efficient manner by exploiting all of the benefits offered. For example with appropriate deployment Smart Antennas can generate savings in the order of more than 35% of the initial infrastructure cost. Symena's knowledge is built on the work of world class European research and development institutions.
